

OPTIMIZE your IT with INNOVATIVE

DATA PROTECTION AND BUSINESS CONTINUITY

I3BDR is an all-in-one data protection and business continuity solution. Leveraging advanced backup technology and virtualization to protect both physical and virtual workloads. Protected workloads, data, and applications can be rapidly recovered in the event of production server downtime or disaster.

HOW THIS SOLUTION IS DIFFERENT

I3BDR revolutionizes the way backup and disaster recovery solutions are deployed, tested and managed by offering an affordable and easy-to-use solution for protecting all workloads in the data center. **I3BDR**, an all-in-one backup appliance for virtual, physical and cloud, is a leader in enterprise-level data protection. **I3BDR** offers the most robust feature set in the data protection industry.

A FEATURE SET LIKE NO OTHER

- **Managed Backup** – Certified professionals monitor backups daily and remediate any inconsistencies.
- **Offsite Colocation** – All deployments of **I3BDR** are replicated offsite to a Tier 4 datacenter; providing offsite backup storage as well as offsite datacenter disaster recovery.
- **DR Tests** – Quarterly DR tests ensure systems will be available in a time of need.
- **Incremental Forever** – Continuous data protection minimizes backup windows and improves recovery point objectives.
- **Instant Recovery** – Dramatically improves RTO; recover your system in less than 10 minutes on or off premises.
- **Adaptive Deduplication** – A hybrid data reduction technology.
- **Encryption** – AES 256-bit encryption for all data.
