

I3Backup

OPTIMIZE your IT with INNOVATIVE

SUPERIOR DATA BACKUP & RECOVERY

Businesses cannot afford to interrupt client care or operations when data goes missing. As data grows and opportunities for mishaps evolve, so does the need for reliable, scalable data backup and recovery.

When local hardware fails, files mistakenly deleted, or full-blown disasters hit, you can count on **I3Backup** for fast, reliable data recovery. **I3Backup** is easy to install and use and can protect whole servers - both system and data volumes - regardless of platform or database structure.

Its multiple layers of protection include 256-bit AES encryption and data storage at two redundant, Tier 4, SAS70 certified data centers, in full compliance with federal and industry regulations.

A budget friendly solution with no agent or server fees, **I3Backup**'s cost is based solely on the amount of backed-up data - not the number of sources.

- **Ease of Use** - User friendly, simple installation with scalable auto-backup and 24/7 file restoration.
- **Automatic Backup** - Easy selection of the files you want to back up on your desired schedule.
- **Off-site Storage** - Backup data is sent via secure Internet connection to redundant data centers for added protection.
- **Scalable** - No need to purchase additional hardware to support your business data growth.
- **File Restoration 24/7** - Restore individual files, revised versions, entire folders, or backup sets, whenever and however many times you wish.
- **Security** - 256-bit AES encryption, passwords, and SSL technology meet compliance requirements of federal and industry regulations, including the NSA, HIPAA, and others.
- **Local Copy Option** - Optionally, keep a local copy of your data at no additional cost for speedier recovery.
