

# I3 CloudCare

for Office 365

OPTIMIZE your IT with INNOVATIVE

## ENHANCING YOUR OFFICE 365 CLOUD INVESTMENT

**Extend the management, visibility and protection of your Office 365 investment.**

### DATA PROTECTION

Exchange Online, SharePoint Online and OneDrive for Business are powerful, cloud-based collaboration and storage services. However, they lack the essential ability to recover messages and documents once they've been removed from the trash and recycle bin. **I3CloudCare** (for Office 365) picks up where those solutions falter. Protecting all your Exchange Online, Sharepoint Online sites and OneDrive for Business data with daily automated backups - providing unlimited historical data protection for your business investment.

### ADVANCED REPORTING & TRENDING

An extension of the built-in Office 365 reports, this solution delivers additional insight and analytics into how the people in your organization use Office 365 services. In addition to extended ad-hoc or scheduled reports, you can drill into the data for deeper insights in a dedicated portal. A complete set of compliance and audit reports are also available to reduce risk and increase visibility into what is happening in your cloud environment.

### MONITORING & REPORTING

In addition to the service availability provided in Office 365, you need to monitor the user experience between your network and the Office 365 Cloud. **I3CloudCare** (for Office 365) captures historical trends and a baseline of the user experience, including authentication and network latency. This information helps you maintain a standard user experience and troubleshoot issues in your cloud environment.

## COMPLIMENTARY STRATEGY SESSION

- ~ actionable insights
- ~ expert guidance
