

BETTER IT MANAGEMENT = BETTER ROI

Manage systems, support clients, and stop problems before they happen through a single dashboard.

Better *IT* services and oversight with less effort. **i3Assist** enables you to automate IT processes, enhance visibility, and improve service levels from a single pane of glass.

Monitoring & Alerts

Discover and control critical items in your infrastructure through powerful monitors and scripts.

Remote Control

Manage workstations, servers, routers, printers, and other network devices from anywhere and without interruptions.

Manage IT Assets

Compile data, audit and manage workstations, servers, printers, routers, and mobile devices.

Backup Critical Configurations

Automatic backup of critical configurations ensures they remain secure, despite worst-case scenario mishaps.

Automate Patches & Updates

Identify, approve, update, or ignore patches and hotfixes for operating systems, Office, and select productivity apps—whether it be one or multiple devices.

Reduce Antivirus Overhead

Manage antivirus infrastructure from a single pane of glass for added control and visibility.

Continuous Health & Security Checkups

Regular tests and proactive recommendations for business infrastructure applications.
