

APPROACH SECURITY WITH  
A ZERO TRUST MINDSET &  
DENY BY DEFAULT

## SECURE YOUR APPLICATIONS

- ✓ Implement **Zero Trust** from end to end in your environment.
- ✓ Implement **Application Whitelisting**—only allow what applications are needed for everyday business.
- ✓ Implement security for **New Applications**—**Deny Everything by Default.**

## SECURE YOUR ACCESS

- ✓ P.A.M.—**Privileged Access Management** (limit local admin accounts).

## NO MORE FREE REIGN

Take **full control** of your applications.

Fortify with **Layered Security.**

Gain a **Zero Trust** environment with a 30-second **Single Click.**

**Limit Application Access**—when running on an endpoint, applications have rights to all data & info as the user.
